Who are we?

We are a team. We are part of ALTEN, a European multinational specializing in providing consulting, information technology, and engineering services to the leading companies in the Portuguese market.

If you like numbers, we can tell you that in Portugal we have a revenue of 10.9 million euros, 2 headquarters, and a team of 215 professionals.

Moreover, at ALTEN, we take pride in offering equal opportunities regardless of gender, age, abilities, or country of origin. Our commitment is to talent and to the people who possess it.

Main Tasks:

- Participate in the development cycle of web applications:
- Collaborate with cross-functional teams to understand requirements and propose solutions.
- Develop and enhance software applications using Java and related technologies.
- Design, implement, and optimise SQL procedures for efficient data retrieval and manipulation.
- Integrate applications with other enterprise systems, using industry-standard integration technologies and best practices.
- Design and implement unitary and integration tests
- Ensure compliance with coding standards, best practices, and security guidelines, and drive the adoption of best practices across the team.
- Conduct code reviews, provide recommendations, and lead code refactoring and performance enhancement efforts.
- Troubleshoot and solve complex technical issues, ensuring timely resolutions.
- Participate in the delivery of the product components in the different environments, in close collaboration with other teams whenever necessary.
